DAY 1, OCTOBER 4, 2011

WELCOME ADDRESSES:

Karim Massimov, Prime Minister, Republic of Kazakhstan
Timur Kulibayev, Chairman, KAZENERGY Association
Günther Oettinger, European Commissioner for Energy
Rudolph W. Giuliani, Chairman and CEO, Giuliani Partners LLC, 107th Mayor of New York City, USA

MAIN TOPICS FOR DISCUSSION:

Geopolitics of Eurasian Energy: Challenges and New Frontiers

Current power development implies mutual dependence, globalisation and partnership with other countries. It is even more important for Eurasian countries which share a common history, enjoy close economic links, and have similar traditions and culture. Overall development of the Eurasian region is influenced by the latest trends in regional integration, market distortions, growing demand, transport route diversification problems, and climate change. In a situation like that, Kazakhstan plays a special role as it has achieved one of the world’s highest rates in oil production during its 20 years of independence.

Chairman: Timur Kulibayev, Chairman, KAZENERGY Association
Co-Chairman: Larry King, CNN Anchor, and the Former Host of Larry king Live (1985-2010)

• 20 years of sustainable development of Kazakhstan energy industry and its role in Eurasia energy sector: achievements, rates of growth, problems and prospects
• Global energy dialogue
• Global energy preparedness: supply, demand, and transit of energy resources. Interdependence of all participants in the global energy exchange
• Meeting the global energy challenges - a Chevron perspective in Eurasia
• Opening new frontiers with innovation and investment
**Sustainable Development of Energy Industry – Relevant Global Energy Supply System**

A sustainable development of the energy industry implies a progress which does not run contrary to the very existence of humankind and helps meet the demand in energy. Compliance with industrial safety and environment protection policies, technical solutions and strategies for adaptation to global warming, regulatory improvement, as well as collaboration between the government and foreign private companies offers an opportunity for a long-term sustainable development. Kazakhstan’s significant advance in this area is based on implementation of a series of government programmes.

**Chairman:** Timur Kulibayev, Chairman, KAZENERGY Association  
**Co-Chairman:** Larry King, CNN Anchor, and the Former Host of Larry King Live (1985-2010)

- Strategic priorities of oil & gas industry development - the key to sustainable development of economy
- Energy scenarios and the future of fossil fuels
- Caspian Region – the focus of geopolitical and economic interests on the global energy arena.
- Pipeline politics and role of the Caspian region in global energy security

**Speakers:**

Kairgeldy Kabyldin, Chairman of the Management Board, JSC NC “KazMunayGas”  
Dr. Randall Gossen, President, World Petroleum Council  
Daniel Stein, Senior Advisor to the Special Envoy for Eurasian Energy, US Department of State  
John M. Roberts, Energy Security Specialist, Platts

**Speakers of the discussion panel**

Thea Khitarishvili, Programme Manager for Caspian and Black Sea Regions, Global Energy Dialogue IEA (International Energy Agency)  
Urban Rusnak, Ambassador, Leader of the Project on external energy security, Republic of Slovakia
Angus Miller, Caspian Energy Adviser, Foreign & Commonwealth Office, Government of the UK

Andrew Neff, Senior Energy Analyst, IHS Energy group

New Horizons for Oil and Gas Industry Development: Investment and Innovation

The oil and gas industry is a driving force for a successful development of Kazakhstan’s economy where a special emphasis is made on innovations and investment in new technologies. This section will highlight specific oil and gas projects in Kazakhstan, effect of pricing policies on the development of the sector, and the latest technologies in oil exploration, production and processing.

Chairman: Nial O’Reilly, journalist, Euronews

- ProspectsofthenewgrowthofliquidhydrocarbonproductionattheKarachaganak field
- The potential for further increases in oil production in the Caspian Sea: Implementation of the Kashagan project*
- ThenewrequirementsofHSEandsocialresponsibilityforsustainabledevelopment of energy projects
- Extent of innovations in the energy sector: improving efficiency and developing geographical, geological, and technical limits of exploration and production
- Enhanced Oil Recovery Technology (EOR) applied to the complex redevelopment of heavy oil fields
- Operating in extreme cold conditions: Total’s experience.

Speakers:

Chris Finlayson, Executive Vice President and Managing Director, Europe & Central Asia, BG Group
NCOC representative*

Nick Maden, Senior Vice President, International Exploration, Statoil

Didier Holleaux, Senior Vice-President, GDF SUEZ E&P

Dr. Stephen Russell Moore, Regional Vice President, Middle East & Central Asia, Mubadala Oil and Gas

Michael Borrell, Senior Vice President, Continental Europe & Central Asia, Total E&P

Speakers of the discussion panel

Campbell Keir, General Manager, Shell Kazakhstan Development B.V., Country Chairman, Shell Kazakhstan

Anuarbek Dzhakiyev, Deputy General Director, Tengizchevroil

Michael Wilson, Director and Managing Partner, Michael Wilson & Partners, Ltd.

Vyacheslav Mischenko, CIS Business Development Director, Argus Media
DAY 2, OCTOBER 5, 2011

WELCOME ADDRESSES:

**Aset Issekeshev**, Vice Prime Minister - Minister of Industry and New Technologies, Republic of Kazakhstan  
**Mr David Moran**, the British Ambassador to the Republic of Kazakhstan and the Kyrgyz Republic

**Nuclear Power – Lessons Learned, and New Opportunities for the Development of RES (In cooperation with World Energy Council)**

The rising prices for traditional energy resources, growing demand and depletion of hydrocarbon reserves, as well as environmental depletion make use of renewable energy sources even more critical. Kazakhstan possesses a huge potential for production of “clean” energy. This section will highlight prospects of using non-traditional types of energy and recommendations for introducing regulatory incentives.

**Chairman:** Slav Slavov, Regional Manager, Europe & Central Asia, World Energy Council (WEC)  
**Co-Chairman:** Andreas Thomas, Senior Vice President Business Development, Vestas central Europe

- The current energy situation in Japan after the Fukushima accident  
- Nuclear-post Fukushima and future: the position of WEC-members  
- The role of innovations, both technical and institutional, in post-Fukushima nuclear energy systems  
- Potential growth of nuclear-power in Kazakhstan  
- Nuclear power or renewable sources? Bad question. The both!  
- Need of robust legal & regulatory framework to promote RES to the market.  
- Wind energy development in the emerging markets including Kazakhstan.  
- Renewable energy potential in Kazakhstan.  
- Turning to lower-carbon power generation & supply, the future role of RES in the energy mix.  
- Renewable energy business models in Kazakhstan  
- TOTAL and the Photovoltaic Solar market

**Speakers:**

**Teruaki Masumoto**, Former Executive Vice President, TEPCO, Chairman, Japanese Member Committee, WEC  
**Alessandro Clerici**, Chairman, Italian Member Committee, WEC, Chairman, Italian Federation of Scientific & Technical Associations (FAST)  
**Randall L. Beatty**, INPRO Group Leader, Nuclear Energy Department, IAEA, Vienna  
**Nurlan Ryspanov**, Board Chairman Deputy, JSC “NAC “Kazatomprom”
Mirek Topolánek, Former Prime Minister of the Czech Republic and Former President of the European Council

Riccardo Puliti, Managing Director, Head of Energy and Natural Resources, EBRD
Andreas Thomas, Senior Vice President Business Development, Vestas Central Europe
Bakhytzhan Dzhaksaliev, Vice-minister of industry and new technologies, Republic of Kazakhstan
prof. Dr. Nasir El Bassam, Director, International Research Centre for Renewable Energy (IFEED), Germany
MoonHee Park, Director, Daesung Institute for Clean Energy, Professor, Department of Informational Statistics, Hoseo University
Gilles Perrot, Project Photovoltaic Solar, Total Gaz & Power

Energy Efficiency and Ecological Safety
Energy efficiency is a long-term top priority of Kazakhstan’s strategic development. Energy efficient technologies help to significantly reduce greenhouse gas emissions and save costs thus improving competitive performance and enhancing ecological safety.

Chairman: Nial O’Reilly, journalist, Euronews

• Issues of sustainable energy and climate change
• Energy realities and climate challenges; a sustainable way forward
• Initiatives implemented at national and international levels to improve energy efficiency and conservation
• Developing Sustainable National and Regional Frameworks for Oil Spill Preparedness
• Energy Efficiency and Emission Management

Speakers:
Nurgali Ashim, Minister of Environmental protection, Republic of Kazakhstan
Hege Marie Norheim, Senior Vice President on climate, Statoil
Almasadam Satkaliyev, Chairman of the Board of directors, “Samruk-Energy”
Catherine Mantel, Project Director for Russia/CIS within the European and International Relations department, GDF Suez
Peter Taylor, Manager, OSPRI, Oil Spill Preparedness Regional Initiative (Caspian Sea – Black Sea – Central Eurasia)
Edwin van den Maagdenberg, Vice President, Honeywell Process Solutions
Catherine Mantel, GDF Suez

Speakers of the discussion panel
Andrii Mitsai, Senior expert, INOGATE
Industrial and Innovative Development of Kazakhstan: Local Content Solutions

A local content increase in supply of hydrocarbon reserves is one of the top priorities for the Republic of Kazakhstan. This section will highlight the national policy in this area, the role of the government, industry requirements, international partnerships, and overall impact on the investment environment.

Chairman: Nial O’Reilly, journalist, Euronews

- Local content policy: coordination of activities by the Government, consistency with other legislative initiatives and regular business realities
- Comprehensive analysis of oil & gas contract chains. Governing relationship between operators and major contractors.
- Impact on investment climate: short- and long-term effects of local content policies
- GE: a proven partner for Kazakhstan. An outlook on diversifying industry

Speakers:

Nurlan Sauranbayev, Vice-minister of industry and new technologies, Republic of Kazakhstan*
Uzakbai Karabalin, Chairman, Kazakh institute of oil & gas
Dauren Abdykhamitov, Chairman, National Agency for local content development (NADLOC)
Murat Munbayev, General Manager, Strategic Planning and Analysis, Tengizchevroil
Cristiano Tortelli, Regional Executive Europe and CIS, GE Energy (TBA)

Speakers of the discussion panel

Mark Rollins, Senior Vice President, Central Asia, BG Group, President BG Kazakhstan
Rinat Mazitov, General Manager, Schlumberger Kazakhstan / Uzbekistan
Aigul Kenzhebayeva, Managing partner, SALANS law firm

Roundtable workshops:

- Workshop №1
  Development of international energy partnerships within the framework of integration unions
  Chairman: Timur Suleimenov, Vice-minister of economic development and trade, Republic of Kazakhstan

  - Workshop №2
    Improving the legislation in the sphere of oil & gas: amendments to the law “on subsoil and subsoil use”
    Chairman: “SNR DENTON” law firm

* - need to be confirmed. For the latest VI KEF Agenda, please visit www.kazenergyforum.com

Dear Organisers of the VI KAZENERGY Eurasian Forum,

The Government of Kazakhstan supports the VI KAZENERGY Eurasian Forum - Kazakhstan: 20 Years of Sustainable Growth, New Horizons for Investment and Cooperation - considering it as an important step in implementing Kazakhstan’s policy of developing international energy cooperation.

Our country plays an increasing role in the Eurasian and global energy markets. This status means that representatives of Kazakhstan’s oil and gas sector must increase their political activity, so as to strengthen our position and promote our interests in today’s diverse world. The meetings, discussions and multi-faceted dialogue between participants in the global energy process during this forum serve as an effective means of accomplishing these objectives.

The forum is being held in a year of great significance for Kazakhstan and its oil and gas industry. There are twenty years since our country gained independence and development began at the giant Tengiz field, which has become a symbol of the success of investment cooperation in the new Kazakhstan. These dates remind us of the huge distance our country has travelled in its development within such a short period of time, and of the role played in this by the energy industry, and the businesses and organisations united within your Association. I am confident that the convening of the VI KAZENERGY Eurasian Forum, and consideration of the changes that have taken place in Kazakhstan in the years since independence, will help us achieve the objectives set by Kazakhstan’s President for both the country and the industry.

Industrial innovation and modernisation, acceleration of social progress and promotion of social initiative – that are key areas of growth where the participation of Kazakhstan’s energy community is significant.

The Government of Kazakhstan supports your international activity and the methods employed for it. Providing assistance to the VI KAZENERGY Eurasian Forum will be part of this support.

Sincerely,

Karim Masimov
Prime Minister, Republic of Kazakhstan
To the participants of the VI KAZENERGY Eurasian forum
Ladies and Gentlemen,

On behalf of the Ministry of Oil and Gas of the Republic of Kazakhstan, I would like to welcome the organisers, participants and guests of the VI KAZENERGY Eurasian Forum.

The KAZENERGY Eurasian Forum has become a widely recognised international event and a platform for government and business representatives to share their views. The forum also plays an important role in facilitating constructive dialogue, in order to identify further areas of development and address current problems in the industry.

Today’s forum is being held in the year in which our country celebrates the 20th anniversary of its independence. In the two decades of independence, Kazakhstan has achieved impressive success in economic, political and social development.

Throughout these years, the oil and gas industry has been the driving force of economic and social reform in the country. Between 1995 and 2010, Kazakhstan’s hydrocarbon sector received nearly 104 billion USD of foreign and domestic investment.

Kazakhstan realises its growing role in the Eurasian energy security system. Predictability of actions, a willingness to negotiate, and consideration of multilateral interests – this is how we understand the ways of achieving energy security.

The strategic international initiatives announced by the President of Kazakhstan, Nursultan Nazarbayev, in 2011 are focused on maintaining stability in energy markets.

The title of today’s VI KAZENERGY Eurasian Forum is “Kazakhstan: 20 Years of Sustainable Growth, New Horizons for Investment and Cooperation”.

I am confident that the forum will contribute to the strengthening of public-private partnership and increase Kazakhstan’s investment attractiveness.

I wish all participants and guests of the forum success in their work.

Sincerely,

Sauat Mynbayev
Minister of Oil and Gas, Republic of Kazakhstan
Dear Participants, Ladies and Gentlemen,

In 2011 the Republic of Kazakhstan will celebrate the 20th anniversary of its independence. Over the course of those years, our country has established itself as a respected sovereign state, and a full-fledged member of the world community known for its dynamic and stable development. Kazakhstan’s energy sector has made a significant contribution to these processes, becoming not only the driving force of economic growth and modernization in the country, but also a strong example of cooperation between government institutions, foreign investors and private business. Since the early 1990s, annual production of oil and condensate has grown almost four-fold to 79.7 MT, which has facilitated to a significant degree the more than ten-fold growth of the national economy. Through our joint efforts, we have almost doubled Kazakhstan’s share of the global oil market, while with respect to uranium the country has become the world leader, producing 17,800 tonnes in 2010. By 2015, annual domestic production of hydrocarbons will reach 95 MT of oil and condensate, and more than 59 billion cubic metres of natural gas.

The energy sector has developed a sustainable and dynamic structure: over the past 20 years we have succeeded in attracting significant investment and balancing the interests of oil and gas market participants, whether state-owned or private entities, domestic or foreign enterprises, transnational corporations or representatives of small business. Today, our priorities are to develop innovation, strengthen local content and social responsibility, establish effective environmental protection systems, and achieve a synthesis between fundamental scientific research and industrial infrastructure.

In this respect, the title of the IV KAZENERGY Eurasian Forum is highly symbolic – “Kazakhstan: 20 Years of Sustainable Growth, New Horizons for Investment and Cooperation.” I am confident that the forum will contribute to more effective cooperation between industrially developed countries and countries that produce natural resources, and serve to develop mutual understanding and international partnerships.

I wish the participants every success at the forum, and I hope the discussions prove effective.

Sincerely,

Timur Kulibayev
CEO, JSC “National Welfare Fund "Samruk-Kazyna"
Dear Ladies and Gentlemen,

On behalf of KazMunayGas National Company, I would like to welcome all the participants and guests of the VIth KAZENERGY Eurasian Forum. This year’s forum is being held alongside KIOGE 2011, the 19th Kazakhstan International Oil and Gas Exhibition and Conference. Every year, the KAZENERGY Forum brings together leading scientists and experts, prominent political and public figures, and representatives of major oil and gas companies from more than 40 countries to discuss current issues in the global energy industry, and energy and climate security.

The scale and complexity of energy problems faced by the world community requires joint efforts and approaches to addressing them. This forum is one of the most effective platforms for discussing the key energy issues for Eurasian countries. The main topic of this year’s KAZENERGY Eurasian Forum is Kazakhstan: 20 Years of Sustainable Growth, New Horizons for Investment and Cooperation.

I am happy to see that the forum is not only limited to a discussion of theoretical issues, but also has a practical aspect. Its programme includes plenary sessions, panel discussions, roundtables, seminars, the KAZENERGY Youth Forum, and a G2B exhibition for health, labour and environmental protection. The Ar-Namys competition will identify the best energy companies in the area of corporate social responsibility.

I am confident that the KAZENERGY Eurasian Forum will help companies to establish business relations and sign mutually beneficial contracts, which will serve as the basis for the creation of successful new projects and joint ventures in Kazakhstan. I hope that the forum proves interesting and effective for the participants and guests.

Kairgeldy Kabyldin
Chairman of the Management Board,
JSC NC “KazMunayGas
Dear participants and guests of the Forum,

Tengizchevroil LLP would like to offer a warm welcome to the VI KAZENERGY Eurasian Forum participants.

In the year of the 20th anniversary of Independence of the Republic of Kazakhstan and the 20th anniversary of the first commercial oil production from the Tengiz field, we continue our quest to further improve upon our strong performance in all areas of our activities. We aim to maintain world-class results in safety, health, environment, reliability and efficiency. In the first half of 2011, we produced 13 million tonnes of crude oil, and sold 664,000 metric tonnes of European standard liquefied natural gas and 3.4 billion cubic meters of dry gas. During this period, sulfur production amounted to 1.1 million tonnes and we sold 1.9 million tonnes, which is 165 percent of production for the period. The success in sulfur sales has led to a reduction in the volumes of Tengiz sulfur inventory to 4.7 million tonnes as of July 31, 2011.

Environmental protection is a top priority for TCO. Since 2000, TCO has invested $2.26 billion U.S. dollars on projects to improve environmental protection. During this period, such investments have enabled TCO to reduce the total volume of gas flared by 97 percent, and the total volume of emissions per tonne of crude oil has been reduced by 74 percent. In the first half of 2011, the average emissions per tonne of TCO oil was 2.14 kg. Meanwhile, TCO has increased annual production of oil by 147 percent over the same time period. As a company dedicated to corporate social responsibility, TCO has invested more than 645 million U.S. dollars during the period from 1993 to 2011 on various social projects dedicated to improving the lives of the Atyrau region community and TCO’s employees. In 2011, TCO’s social infrastructure program, Egilik (‘benefit’ in Kazakh), has focused on furthering the reconstruction of the water supply system in the city of Kulsary. This multi-year project has a total cost of $61 million U.S. dollars.

In 2011, TCO’s Community Investment Program focused its $800,000 U.S. dollar budget on programs designed to improve the quality of health care, education and training in the Atyrau region. TCO supports the efforts of the government of the Republic of Kazakhstan to increase Kazakhstani content in goods and services. During the first half of 2011, TCO spent $746 million U.S. dollars on purchasing goods and services from Kazakhstani suppliers. From 1995 to the middle of 2011, TCO has purchased goods and services totaling $10.35 billion U.S. dollars from Kazakhstani suppliers.

TCO recently received a “Company of the Year in the Oil and Gas Industry” award from
the Ministry of Labor and Social Protection. The award was for proven commitment to high standards in health and safety, with the aim of achieving zero workplace incidents. TCO provides comprehensive support to the KAZENERGY Association and attaches great importance to the KAZENERGY Eurasian Forum. Thanks to the efforts of the organizers, a rich and interesting program is offered this year. Topical issues have been chosen for discussion, and we will look forward to hearing the presentations and opinions of the forum participants. We hope that the wide-ranging debate on current industry issues will be useful for the further development of the country’s energy sector. We wish the participants of the forum every success.

Sincerely,

Tim Miller
General Director
Tengizchevroil LLP

Anuarbek Dzhakiyev
Deputy General Director
Tengizchevroil LLP
On behalf of BG Group I am delighted to welcome the participants of the Kazenergy Forum in the 20th anniversary year of the independence of Kazakhstan. In that time, Kazakhstan has become the unquestionable leader of Central Asia. One key reason for this success is the wise policy of openness to international investment, expertise and skills. This has enabled Kazakhstan to unlock the potential of its great natural wealth, bringing stability, growth and prosperity to its people.

BG Group has been a partner with Kazakhstan since independence. We are proud of the contribution we have made to the Republic’s success, and we look forward to strengthening our partnership in the years ahead.

The task that now faces us all is to build on the successes of the first two decades. Having secured growing prosperity in Kazakhstan, we must work together to achieve the full modernisation of the economy through policies that support investment, innovation and local content. This will require an even closer and richer dialogue between the Republic, investors and other partners. The KAZENERGY Forum is an excellent opportunity to deepen the co-operation that will help achieve our shared goals. I look forward to a successful and productive Forum.

Chris Finlayson

KARIM MASSIMOV
Prime Minister, 
Republic of Kazakhstan

He began his career as chief economist and department head at the Ministry of Labour, and then as senior specialist at the Representative Office of the Ministry of Foreign Economic Relations in Urumqi, China, and Executive Director of the Kazakhstan Trade House in Hong Kong. He was Chairman of the Board of Almaty Merchant Bank and Halyk Savings Bank. He was appointed the Minister of Transport and Communications, Deputy Prime Minister, and Assistant to the President of the Republic of Kazakhstan.

In January 2006, he became Deputy Prime Minister of the Republic of Kazakhstan.

In April 2006, he was appointed Prime Minister of the Republic of Kazakhstan and Minister of Economy and Budget Planning.

Since January 2007, he has served as Prime Minister of the Republic of Kazakhstan.

ASET ISSEKESEHV
Vice Prime Minister - Minister of Industry and New Technologies, 
Republic of Kazakhstan

A.Issekeshev was born in August 17, 1971 in Karaganda.

In 1994 he graduated from the Al-Farabi Kazakh State National University with a major in law and in 1998 graduated from the Higher School of Public Administration under the President of the Republic of Kazakhstan. He also attended and completed a number of special programmes on economy and finance in South Korea, England, and Germany.

In 1995-1997 worked as Assistant and Senior Assistant Attorney in Medeu District in Almaty.

He worked as Chief Officer with the Agency for Strategic Planning and Reforms (1998-1999).

He headed Justice Ministry Department for Registration and Enforcement of Central and Local Agencies’ Regulations(1999-2000).

From 2000 to 2001 he was President of the Legal Consulting Services CJSC with Justice Ministry; later worked in the private sector.

From November 2002 to June 2003 he was Advisor to the Minister of Economy and Budget Planning.

He held portfolio of the Vice Minister of Industry and Trade in 2003.

He became Vice President of the Board at “Kazyna” Fund for Sustainable Development in 2006.

From 2007 to 2008 - Director for Marketing of financial projects with Credit Swiss (Kazakhstan).

From February 2008 to May 2009 served as Assistant to the President of Kazakhstan. He
was the Chairman of the Board of Directors at Development Bank of Kazakhstan JSC, National Innovation Fund JSC, etc. 
He is Minister of Industry and Trade from May 2009. 
In March 2010 he was appointed as Vice Prime Minister – Minister of Industry and New Technology.

SAUAT MYNBAYEV
Minister of Oil and Gas, 
Republic of Kazakhstan

Sauat M. Mynbayev was born in 1962. In 1985 he graduated from Moscow State University named after M.V.Lomonosov as economist-cybernetist. He has PhD degree in Economics. 

NURGALI ASHIM
Minister of Environmental protection, 
Republic of Kazakhstan

Nurgali Ashim was born in 1959 in Shymkent. 
Starting from 1981 was employed as junior research fellow at R&D Institute under the State Planning Committee. In 1987 was promoted to the Head of Department of the R&D Institute under the State Planning Committee. Starting from 1990 he worked as a senior teacher at the National Institute of Continuing Education under the Council of Ministers, senior teacher at Kazakh Chemical-Engineering Institute. Starting from March 1992 – advisor to South-Kazakhstan Oblast Governor; in August 1992 – appointed the Vice Governor of South-Kazakhstan Oblast and the Chairman of Territorial Commission for State Property in the same Oblast. Starting from 1996 – the Head of the National Bank’s Regional Administration of South-Kazakhstan Oblast. Starting from 1997 – the Vice
Minister of Economic Affairs and Trade. Starting from 1997 – the Deputy Chairman of the Board of “Bank Turan Alem” CJSC. Starting from 1998 – the Vice Governor of Kostanay Oblast. Starting on February 1999 – the Governor of Kostanay city. Starting from July 2000 – the Vice President for Commerce and Marketing at “KazTransGaz” CJSC. Starting from November 2000 – the General Director of “Intergas Central Asia” CJSC. Starting from January 2001 – the President of “KazTransGaz” CJSC. Before his current position, he served as the First Vice Minister of Energy and Mineral Resources. In 2007-2009 – the Governor of South-Kazakhstan Oblast. Since March 2009 – the Minister of Environmental Protection of the Republic of Kazakhstan.

NURLAN SAURANBAYEV
Vice-minister of industry and new technologies, Republic of Kazakhstan

Nurlan Sauranbayev was born on 20 May 1967 in Zhambyl. In 1991 he graduated from the Al Farabi Kazakh State University, in 2001 – from ENI-Agip Centre for Petroleum Industry Training. MBA (Oil & Gas).

His working career started in 1991 with Yenbek LLP, Almaty, where he held the position of Director till 1997. From 1997 to 1998 he was Executive Director of the Congress of Entrepreneurs of the Republic of Kazakhstan, Almaty. Director of the Passenger Operations Subsidiary, Kazakhstan Temir Zholy, Republican Organization, Almaty till 2000. From 2000 to 2001 he held position of First Vice President of Atyrau Oil Refinery OJSC, Atyrau. He was appointed as General Manager and Project Team Manager of Atyrau Oil Refinery Reconstruction, KazakhOil National Oil Company CJSC, Astana. (2002)
Director of the Engineering and Service Project Department, NC KazMunayGas CJSC, Astana till 2004. From 2004 to 2007 he worked as Deputy General Director of TenizService LLP, Aktau. Managing Director of KazMunayGas National Company JSC, Astana from 2007 to 2010.

In 2010 was appointed as Adviser to the Deputy Chairman of the Board, Samruk-Kazyna National Welfare Fund JSC, Astana. In January 2011 he became Managing Director of Samruk-Kazyna National Welfare Fund JSC, Astana.

In May 2011, Mr. Sauranbayev was appointed Vice Minister of Industry and New Technologies of the Republic of Kazakhstan, Astana.

In 2007, he was awarded with Kurmet Order.
BAKHYTZHAN DZHAKSALIYEV  
Vice-minister of industry and new technologies,  
Republic of Kazakhstan

Bakhytzhan Dzhaksaliyev was born on June 5, 1960 in the city of Almaty. In 1982 he graduated from the Almaty Institute of Energy, Specialty: Thermal power stations.

After the graduation he started his career as an industrial engineer at Kazenergonaladka.

From 1984 he worked as an engineman of the power-generating unit, a shiftman of the Ekibastuz hydroelectric power station GRES-1. In 1990 he became a chief engineer of the maintenance division of the Alma-Ata Energo Heating System Enterprise. From 1993 he worked as a chief expert, the head of the Power Energy, Coal and Atomic Industry Department of the Republic of Kazakhstan Ministry of Energy and Fuel Resources.

From June 2011 he was appointed to the position of the Republic of Kazakhstan Vice-Minister of Industry and New Technologies, Astana.

Bakhytzhan Mukhambetkaliyevich Dzhaksallyev is a CIS Honorable Power Engineer.
TIMUR KULIBAYEV
CEO, JSC “National Welfare Fund "Samruk-Kazyna"

Timur Kulibayev was born in Almaty in 1966. In 1988, he graduated from the Moscow State University named after M.V. Lomonosov majoring in National Economy Planning, an economist by profession. In 1999, he get a Candidate of Science degree (Economics). He worked in the Scientific-Research Economic Institute of Planning and Normative Standards under the State Planning Committee of the Kazakh SSR (1988-1990), held a position of Director of the Scientific Consulting Centre of the Kazakhstan Cultural, Social, Scientific and Technological Development Fund (1990-1992), headed Altyn-Alma Concern, was Chairman of the Supervisory Board of Almaty Trade and Industry Bank (1992-1997). In 1997, he took a position of the head of the Directorate for Project Assessment and Negotiating under the State Investment Committee of Kazakhstan. From 1997 till 1999, he was Vice President for Economy and Finance of KazakhOil National Oil Company CJSC. In 1999, he was appointed President of KazTransOil National Oil Transportation Company CJSC, in 2001, General Director of Oil & Gas Transportation National Company CJSC, and in 2002, First Vice President of KazMunayGas National Company JSC.

State awards of the Russian Federation: the Druzhba Order (2007), the Al-Fahr Order of the Council of Muftis of Russia (2010), and the Order of the Russian Orthodox Church of Saint Blessed Duke Danila of Moscow, 2nd Grade (2010).
The Tengiz field in Western Kazakhstan was discovered in 1979 and now is one of the world's deepest producing super giant fields.

Advancing the Future

Developing People to Continue Innovation at Tengiz

TCO’s greatest asset is our people and our company’s success would be impossible without the input of our strong workforce. Our teams recently eliminated flaring with a unique $260 million gas utilization project. And, in 2010, the TCO team celebrated record-setting performance from our Second Generation Plant, the largest sour crude oil processing train in the world.

He has Bachelor of Science (Hons) in Physics & Master Degree in Petroleum Engineering.

Dr. STEVE MOORE  
Regional Vice President: Middle East and Central Asia, Mubadala Oil and Gas

Dr. Moore has been associated with oil and gas projects in Kazakhstan since year 2000 following the discovery of the Kashagan field. In the period up to end 2005 he represented Shell Kazakhstan at various levels in the NC-PSA. In parallel he was responsible for new business development leading to the successful acquisition of KerMcGee’s Kazakhstan assets as well as entry to the offshore Pearls concession area. In late 2005 he moved to Almaty where he managed Shell’s operated assets. End 2006 Dr. Moore joined Maersk Oil Kazakhstan as Head business development with particular focus on leveraging the potential of the Dunga field. In June 2009 Dr. Moore took up his current position with Mubadala Oil and Gas in Abu Dhabi. As well as managing their interest in the N-block he is responsible for existing ventures in Oman, Bahrain and Qatar.
CRISTIANO TORTELLI
Regional Manager, 
Europe & Central Asia, World Energy Council

Cristiano Tortelli is President GE Energy for Central & Eastern Europe, Russia and CIS, where he has operational responsibility for GE Energy’s entire range of products and services in the region. Prior to his current role, Cristiano was the Global Sales General Manager for the Turbomachinery business of GE Oil & Gas, based in Florence, Italy. He joined GE Oil & Gas in 2000 in the Industrial Plant Division as Commercial Operation Leader for Africa & Middle East. During the past ten years, Cristiano has held roles of increasing responsibility at GE Oil & Gas, including West Africa Operations General Manager, based in Luanda (Angola); Middle East Region Manager based in Abu Dhabi; and Qatar Operations Leader based in Doha.

SLAV SLAVOV
Regional Manager, 
Europe & Central Asia, World Energy Council, London

His previous function was Adviser on Sustainable Energy Policies, United Nations Economic Commission for Europe (UNECE), Geneva, Switzerland, (1980-2004). He was Coordinator of the UNECE with OPEC and IAEA-Vienna (2001-2004). He currently holds the position of WEC Regional Manager for Europe & Central Asia, World Energy Council, London. His main occupations in United Nations include formulating & implementing energy policy and programmes; active involvement in restructuring of coal and power thermal sector in Central & Eastern Europe, including Russia (1990-1997); a Project Manager of a number of UN- global & regional projects related to energy resources assessment, energy efficiency, transition to market conditions. He graduated from Technical University in Sofia, Bulgaria (Mining & Geology) followed by energy economics.
Экспертное бюро "Energy Focus" выпускает журналы "KAZENERGY", "Ring.kz" и "Медикер", которые были признаны лучшими внешними корпоративными журналами 2011 года по результатам IV Республиканского конкурса корпоративных СМИ.

"KAZENERGY", "Ring.kz" and "Mediker" publications, produced by expert bureau "Energy Focus" were recognized as the best external corporate magazines in 2011 according to the results of IV Republican contest of the corporate media.
TERUAKI MASUMOTO
Chairman of Japanese Member Committee,
World Energy Council,
Former Executive Vice President,
TEPCO

After graduating from the university he joined TEPCO. Devoted his career mainly to the field of corporate communication and environment issue, including Director of Corporate Communication Department and Environment Department (1995-1999), Managing Director (1999-2001), and Executive Vice President (2001-2004).
He was also Vice Chairman of The Federation of Electric Power Companies of Japan in 2004. Also served as a Member of Executive Committee of the World Business Council for Sustainable Development, Member of Global Agenda Council of World Economic Forum and Chairman, Subcommittee on Global Environment, Committee on Environment and Safety, Japan Business Federation. He serves as an advisor of Japan Business Federation on Climate Change.
Mr. Teruaki Masumoto is serving as Chairman of Japan Energy Association and Chairman of Japanese Member Committee, World Energy Council since May 2008. He also serves as an Executive Advisor of Tokyo Electric Power Company (TEPCO). Received a BA in Political Science and Economics from Waseda University in 1962.

ALESSANDRO CLERICI
Honorary Chairman of WEC-Italian Member Committee,
Chairman of Italian Federation of Scientific & Technical Associations (FAST)

Sandro, “Dr. in electrical engineering” from the "Milan Polytechnic Institute“, has spent 50 years in the energy sector in more than 50 countries and has actively participated/led Generation, Transmission and Distribution System studies/projects, with personal involvement in the development of the largest EHV and UHV systems worldwide including the Chinese AC 1000 kV and the DC +/- 800 kV ones.
He has been Director of CESI (Italian Electrical Experimental Centre); Vice President of SADE Sadelmi Group (Contracting Company of G.E.); Managing Director of “ABB Power Systems Italy”; President of the R&D Center and Executive Vice President Business Dev. & Technology of ABB Italy and member of its Executive Committee. Currently he is Senior Advisor to the CEO of ABB Italy.
He has covered and covers important positions in cultural/scientific associations (WEC, IEEE, IEE, CIGRE, etc.). He has been the Chairman of the WEC “Survey of Energy Resources Committee” and of the WEC Working Group “The future of nuclear in Europe” and Director of the WEC Task Force on Interconnectivity. He has been appointed in 2011 as a Chairman of WEC Study group “Survey of Energy Resources and Technologies” and of the Task Force "Nuclear energy after Fukushima".
Mr. Clerici is Honorary Chairman of the WEC Italian Committee and of FAST (Italian
Federation of Scientific and Technical Associations) and is Vice President of The Italian IEC Committee; he is Past President of the Italian Electrical Association.
In Confindustria (Italian Federation of Industrial Associations) he is member of the Energy Committee, Chairman of the Task-Force on “Energy Efficiency” and active member of the Working Groups on “renewables”, “nuclear” and “electricity and gas markets”.
He has authored or co-authored more than 300 papers in the energy field.

RICCARDO PULITI
Managing Director,
Head of Energy and Natural Resources, EBRD

He started his career at Istituto Mobiliare Italiano (IMI) Group in 1987, he then moved to Banque Indosuez in Paris where he worked in M&A and equity capital markets. He then joined NM Rothschild and Sons in London where he held several positions in M&A and equity capital markets. Riccardo has extensive experience in emerging market economies, working with both the private and public sectors.
Riccardo joined the EBRD in 1996 in the Power and Energy Utilities department and moved to Natural Resources in 1998. In 2000, he was appointed Deputy Director of Municipal and Environmental Infrastructures and in 2002, Director of Transport Infrastructures.
Riccardo Puliti is the Managing Director in charge of the Energy and Natural Resources sectors at the European Bank for Reconstruction and Development. He was appointed in this role in 2007.
Riccardo holds various Supervisory Board and Board of Directors memberships in investee companies.
He is an MBA alumnus of Instituto de Estudios Superiores de la Empresa (IESE) and a postgraduate alumnus of the Kennedy School of Government (Harvard University) and Imperial College.
Riccardo is fluent in six European languages.
Common interests
Imagine if confronting climate change and solving energy needs were inseparable.
RANDALL L. BEATTY  
INPRO Group Leader, 
Nuclear Energy Department, IAEA, Vienna

From 1996-2003, Mr. Beatty was the United States Deputy Executive Director (DED) for the International Science and Technology Center (ISTC) and lived in Moscow, Russia. In this capacity, he served as a senior diplomatic representative for the Department of State, and as a Science Advisor to the US Ambassador to Russia. Prior to this Mr. Beatty held positions as Technical Advisor to DOE/NN-1; New Independent States Initiatives for Proliferation Prevention (NIS IPP) Program Manager; Inter-Laboratory Board Chairman (IPP Program); Senior Program Manager for the Oak Ridge Centers for Manufacturing Technology (ORCMT); AVLIS Senior Program Manager; and Vice President for Marketing (SAIC). Mr. Beatty is currently the INPRO Group Leader at the International Atomic Energy Agency (IAEA) in Vienna Austria provided by the U.S. Department of State. INPRO is the IAEA's International Project on Innovative Nuclear Reactors and Fuel Cycles for the 21st Century. Prior to his appointment in Vienna he was Director of International Programs for Science and Technology, US Department of Homeland Security (DHS) and a Senior Program Manager for the Advanced Reactors and Fuels Group at Oak Ridge National Laboratory. Mr. Beatty has a PhD in Engineering Management from Kennedy Western, a M.Sc. degree in Engineering Administration, University of Tennessee and a B.Sc. in Chemistry, George Washington University. He previously worked as Science Advisor to the Department of State, Office of Proliferation Threat Reduction International Program Specialist to the Department of Homeland Security; United States Deputy Executive Director at the International Science and Technology Center; Technical Advisor DOE/NN-1; NIS IPP Program Manager; Inter-Laboratory Board Chairman (IPP Program); Oak Ridge Centers for Manufacturing Technology; AVLIS Senior Program Manager; Vice President for Marketing (SAIC).

ANDREAS THOMAS  
Senior Vice President Business Development/Managing Director, Vestas Central Europe

Andreas Thomas has long experiences in major projects in the wind energy business and holds a degree in Engineering. In 2001 he started at Vestas Central Europe as Sales Engineer. Since 2007 he is Managing Director of Vestas Österreich GmbH and different Vestas subsidiaries in Eastern Europe whereby he is successfully capturing the market. In addition, Andreas Thomas is Senior Vice President Business Development for Eastern Europe. Andreas Thomas considers Kazakhstan as an important market with good potential for several projects.
EDWIN W. VAN DEN MAAGDENBERG  
Vice President Technology & Operations,  
Honeywell Process Solutions

Previous to all this Edwin has held various roles within Honeywell HPS the Netherlands and Northern Europe. Edwin joined Honeywell in 1988 where he started his career as a Sales (support) Engineer. Then he became Account Manager and from 2003 to 2005 he was Sales Manager & Country Business Leader. From 2005 to 2009 he was the Regional General Manager for Northern Europe. In that role, he led and grew the business in the largest region (10 countries) in all HPS. Edwin’s leadership and broad management capabilities were crucial to the success of the business in Northern Europe. Edwin was the Vice President & General Manager for HPS EMEA. This included sales, delivery and support of distributed control systems, quality control systems, advanced solutions and field sensors which are installed in Refining, Paper, Chemical, Pharma, Power Generation, Consumer Product Manufacturing and other process industries. Since July 2011, Edwin van den Maagdenberg has become the Vice President Technology & Operations. Together with his team his mission is to improve customer experience and satisfaction by providing best-in-class technology, tools, process and back-office service and engineering around the world. Edwin has a degree in electronics and he participated in the Honeywell Advanced Management Program, Thunderbird Leadership program and is Greenbelt certified.

MOONHEE PARK  
Director, Daesung Institute for Clean Energy,  
Professor, Department of Informational Statistics,  
Hoseo University, Asan

MoonHee Park was born at Icheun, Korea, 1965. He started his professional career as Research Associate at Energy Systems Research Center from 1992 to 1998. For two years between 2006 and 2008 he held positions of Advisor at Korea Forest Service and Director at Demonstration of system to combat desertification using renewable energy. Since 2000 he has been Professor at Department of Informational Statistics, Hoseo University. From 2003 he is a Director, Daesung Institute for Clean Energy. Since 2008 he has been Director, Tower-type Solar Thermal Power Plant with 200 kW of generation capacity and Director of Construction system to combat desertification and electrification of Mandakh Soum (Mongolia) using renewable energy (International Cooperation for Climate Change Mitigation Support for Non-Annex Countries under UNFCCC) He holds a number of degrees such as B.S in Industrial Engineering, M.S in Energy Study, PhD in Energy and Post-doctoral in Energy System Research Center at Aju University. His professional areas include Renewable Energy, Energy Systems Analysis, Science Technology Policy.
ANDREI KONOPLYANIK
Consultant to the Board, Gazprombank, Adviser to the Board, GPB Neftegas Services B.V., Moscow office, Professor, Russian State Oil & Gas University n.a.acad.Gubkin

His major professional areas are energy economics, energy and investment legislation, energy project financing.

In the late 1970s and through the 1980s, he researched international energy issues at the Institute of World Economy & International Relations, USSR Academy of Sciences (IMEMO). Also, in 1990-1991, he worked as Chief Specialist at the USSR State Planning Committee (GosPlan). During 1991-1993, A. Konoplyanik served as Deputy Minister of Fuel and Energy of Russia with particular responsibility for external economic relations and direct foreign investment. In 1996-1999, A. Konoplyanik worked as Executive Director of the Russian Bank for Reconstruction and Development.

In 1999-2002, he was President of the Moscow-based Energy and Investment Policy and Project Financing Development Foundation. As a non-staff adviser to Russia’s Ministry of Fuel and Energy, he took part in the drafting of the Russian Energy Strategy until 2020. Since 1993 through 2002, he also worked as a non-staff adviser to the Russian Federal Government (Vice Prime Minister) and a number of federal ministries (Fuel and Energy, Economy, Finance), and as a consultant to the Russian State Duma committees (on economic policy, on natural resources and their use), where he headed the drafting group preparing investment-friendly legislation on Production Sharing Agreements. From March 2002 through May 2008, A. Konoplyanik worked as Deputy Secretary General of the Energy Charter Secretariat in Brussels, Belgium.

Since 2008, he has served as Consultant to the Board of GazPromBank, Adviser to the Board of GPB NefteGas Services B.V., Moscow Branch, and Professor of the Chair of International Oil and Gas Business, Gubkin Russian State University of Oil and Gas.

He is a member of the New York Academy of Sciences (since 1994); member of the International Association for Energy Economics (since 1997); member of the International Bar Association (since 1997); and member of the Association of International Petroleum Negotiators (since 1999). He is an Honorary Fellow of the Centre for Energy, Petroleum & Mineral Law & Policy, University of Dundee, Scotland (since 1994).

He has more than 400 articles on energy issues published both in Russia and abroad. He is a frequent speaker at different international energy conferences and has taken part in writing more than 50 monographs. He is an energy economist, doctor of economy and professor.
THEA KHITARISHVILI
Programme Manager,
Caspian and Black Sea Regions,
Directorate of Global Energy Dialogue,
International Energy Agency

Thea Khitarishvili is Programme Manager for the Caspian and Black Sea Regions at the International Energy Agency. Before joining the IEA she worked as a Senior Expert at the Energy Charter Secretariat in Brussels. Her prior assignments include the position of Legal Consultant with the leading energy consulting firm Nexant Inc. at its London office, Resident Representative for the TransCaspian Gas Pipeline Consortium of Shell EP International BV and PSG International (Bechtel and GE Capital Company) in Georgia, and Chief Legal Adviser for Hagler Bailly Consulting in Georgia/South Caucasus.

Ms Khitarishvili has more than fifteen years of professional experience working in the Energy Sector. Over this period, she has worked in different capacities ranging from advisor to governments or project sponsors, to working for project developers themselves. Transactions that she has had a leading role in negotiating include multinational treaty supplementary instruments, the development of cross-border oil and gas pipelines and electricity transmission lines, energy sector restructuring, privatizations, setting up regulatory regimes, merges and acquisitions and capital market financing in energy utilities and transportation sectors.

Regions covered throughout her professional career include Central Asia, South Caucasus, Sub-Saharan Africa and South East Asia for a wide range of clients, including various governments, private energy companies, international organizations, intergovernmental and multilateral institutions.

ANDREW NEFF
Senior Energy Analyst,
IHS

Andrew Neff joined WMRC (now IHS) in December 2002 as Senior Research Analyst for energy issues. In his current capacity as a Senior Energy Analyst with the IHS Energy group, he provides analysis and insight on government policy and company strategy on energy developments.

His responsibilities include coverage of the Commonwealth of Independent States (CIS) and Turkey, with a special emphasis on Russia and Caspian Sea oil and gas, as well as national oil companies (NOCs) and company strategy. Andrew regularly provides presentations on Russian and Central Asian oil and gas issues, Turkish gas and power developments, and company strategy to energy companies and investment banks, as well as at a variety of industry conferences. He is also a frequent radio and television commentator on energy industry developments in the CIS and Turkey.

Prior to joining the company, Andrew worked as an international energy analyst for a contractor to the Energy Information Administration, the statistical division of the U.S. Department of Energy. Andrew holds an MA in international affairs and environmental policy from George Washington University’s Elliott School of International Affairs.
MICHAEL WILSON
Managing Director,
Michael Wilson & Partners, Ltd.

Michael was the founding partner of Baker & McKenzie in Kazakhstan, Central Asia and the Caucasus, and has been a permanent resident in Kazakhstan since January 1995. Michael Wilson is the Managing Director of Michael Wilson & Partners, Ltd. (MWP), 1998, which operates in Kazakhstan, Azerbaijan, Kyrgyzstan, Uzbekistan, elsewhere in Central Asia, and on different projects in Russia and Ukraine. Michael has initiated and led many of the major privatisations and other projects to date in Kazakhstan, and has been involved in many of the largest projects of the region. He has more than 13 years of experience practicing law in London and Sydney, and more than 17 years in Central Asia, the Caucasus & Russia. His Business Associations are Law Society of England & Wales; Major Projects Association; Founding Member, past Treasurer and Chairman of the European Business Association of Kazakhstan (1998-2004); Member of the American Chamber of Commerce in Kazakhstan; Founding Member of the Business Lawyers Association of Kazakhstan; Selected by the EBRD as a member of the Foreign Investors Council under the President of the Republic of Kazakhstan, being the leading foreign lawyer practising in Central Asia (1998). He graduated from Manchester University, UK, 1980, and Chester Law School, UK, 1981.

AIGUL KENZHEBAYEVA
Managing Partner
Salans Law Firm

Aigul Kenzhebayeva is the founder and managing partner of Salans offices in Almaty and Atyrau. She has an extensive experience of advising on legal and tax aspects of investment activity in Kazakhstan. As a practicing lawyer with over 30 year of practice, Aigul Kenzhebayeva specialises in the sphere of corporate law, energy and natural resources, dispute resolution, infrastructure projects, as well as in the field of anti-monopoly and anti-corruption legislation. Ms. Kenzhebayeva also regularly advises on projects in Uzbekistan and Kyrgyzstan. Aigul Kenzhebayeva is a member of the Editorial Board of the International Arbitration Magazine published by the Arbitration Institute of Stockholm Chamber of Commerce, a member of the Board of Directors of the Kazakhstan Petroleum Lawyers’ Association, and a member of the Working Group on Legal Affairs of the Council of Foreign Investors under the President of the Republic of Kazakhstan. Ms. Kenzhebayeva occupies leading positions among Kazakhstan’s prominent lawyers according to the ratings by such international legal publications as Chambers Global, Legal 500, PLC Which Lawyer, Who’s Who Legal, and IFLR1000. According to Chambers Global, Aigul Kenzhebayeva’s customers emphasise that she is “a really strong and intelligent woman who can ensure successful completion of any transaction.” “She has
gained high recognition for her court practice, negotiating skills and ability to navigate in complex issues and intricacies of Kazakhstan legislation.”

**VYACHESLAV M. MISCHENKO, CIS Business Development Director**
**Argus Media**

For the last decade Mr. Mischenko has worked extensively in CIS, Central and Eastern Europe, Baltic and Caspian Region performing a significant number of studies and projects related to energy and fuels markets. Mr. Mischenko acted as a leader for many types of projects including: energy economics and energy commodities prices, infrastructure & transportation (infrastructure studies, freighting costs, pipeline economics, railway economics, storage capacity analysis) etc.

In his current capacity at Argus Media Mr. Mischenko is leading the business development activities in CIS countries.

Argus Media is a global provider of price assessments, business intelligence and market data for the global crude oil, petroleum products, gas, LPG, coal, electricity, biofuels, biomass, emissions and transportation industries.

**JOHN M. ROBERTS**
**Energy Security Specialist, Platts**

John Roberts is Energy security specialist with Platts, the world’s leading independent source of energy information. Platts is part of the McGraw Hill publishing group.

His latest study, Pipeline Politics: The Caspian and Global Energy Security, is currently being jointly published by Platts and the UK’s Royal Institute of International Relations (the US publisher is the Brookings Institution). A frequent commentator on global energy issues on BBC television and radio and an acknowledged expert on Caspian and European pipelines. John M. Roberts has also given testimony to UK parliamentary committees on the Russian and Caspian roles in global energy security and on Persian Gulf security issues.

His recent specialist papers and presentations include: Iraq: The Need for Upstream Development (London, 2011); Beyond Nabucco, ITGI and TAP: What Else is at Stake in the Southern Corridor (Baku, 2011); Russia, The Caspian and Other Uncertainties (ICEED, Boulder, CO. USA, 2011); Turmoil in the Middle East & North Africa: Implications for Energy Security (London, February 2011; Balancing Europe’s Gas Equation: Russia, LNG, Shale Gas (Dubai, 2011). Russia, the Caspian and Europe’s Changing Energy Environment (Moscow, 2011); Central Asia’s Role in Gas Provision and Transportation (Kuala Lumpur, 2010); Unconventional Gas: Promise and Reality (London, 2010).

His books include Caspian Pipelines (1996) and Visions & Mirages: The Middle East in a New Era (1994).
PETER TAYLOR
Manager,
OSPRI, Oil Spill Preparedness Regional Initiative (Caspian Sea – Black Sea – Central Eurasia)

He spent six years in environmental consultancy prior to specializing in oil spill preparedness and response activities for the last 20 years. Mr. Taylor has been supporting the International Petroleum Industry Environmental Conservation Association (IPIECA) since 1998, helping them promote effective contingency planning around the world. This work involves close cooperation with national governments, regional bodies and other international partners, including the International Maritime Organization.

He has managed IPIECA’s Oil Spill Preparedness Regional Initiative (Caspian Sea – Black Sea – Central Eurasia), known as OSPRI, since its inception in 2003 to the present. His work with OSPRI has seen him actively involved with all littoral States of the Caspian Sea and Black Sea.

He has also been supporting the development of regional cooperation in cases of major oil pollution within the Caspian Sea region through the Tehran Convention process. He has been involved in over 400 oil spill related projects. These projects have included oil spill contingency planning, training and the development of simulation exercises, alongside providing guidance during the response to major oil spills.

Mr. Peter Taylor graduated from Leeds University in the UK with a degree in biological sciences.

Еще один рабочий день

Баренцево море. Трудно представить себе более тяжелые условия работы. Но мы с ними хорошо знакомы. На норвежском острове Мел coffey, расположенном на 70° северной широты, компания “Статойл” с 2007 года производит сжиженный природный газ. Транспортировка и переработка газа осуществляются в экстремальных климатических условиях, что предъявляет исключительные требования к людям и технологиям. Но мы делаем свое дело. Июнь в день. Здесь нельзя останавливаться на достигнутом. Ведь мы знаем по опыту, что природа требует к себе внимательного и бережного отношения.

Для устойчивого развития нужно больше чем просто технологии
Вот почему «Сименс» находит ответы для будущего – для людей, для бизнеса, для окружающей среды.
В 1884 году Вернер фон Сименс заявил: «Я не стану рисковать будущим ради сиюминутной выгоды». Эта философия мы следуем и сегодня. Наши газотурбинные установки, утилизируя попутный газ, решают вопросы экологии на западе Казахстана, системы автоматизации и безопасности зданий дают комфорт жителям республики, а высокотехнологичное медицинское оборудование обеспечивает раннюю диагностику заболеваний населения страны.
Мы даем ответы на самые сложные вопросы современности – для будущего.

siemens.com/answers
We’re defined by what we pass on to the next generation. That’s why ConocoPhillips is funding elementary school energy education programs and partnering with universities to research and develop new energy sources. And we’re stepping up our own research to create new, cleaner fuels and improve environmental performance. So we can pass on what matters … to the ones who matter most.
An investment in knowledge always pays the best interest

Benjamin Franklin

Over 86% of our subscribers say that “Upstream has helped them or their company identify leads or business opportunities.”

For these oil and gas professionals, Upstream is an investment.

To stay fully abreast of the latest energy news from around the world, you could try subscribing to multiple publications or spend hours trawling the web. Alternatively, you could get it all from one high-quality and reliable source – Upstream.

In addition to the acclaimed weekly newspaper, subscribers are given full access to UpstreamOnline.com, offering unlimited access to our live 24-hour news service, a complete electronic archive with improved search engine capabilities and a new electronic version of the paper far superior to the previous pdf copy. You can also choose to receive daily news bulletins containing a quick summary of the must-read news from the last 24 hours. Altogether, a wise investment in knowledge that saves you time and helps your business.

Why waste time and money on scores of magazines, newsletters and overpriced reports when your energy information needs can be met through one single subscription to Upstream? For your free two-week trial please go to www.upstreamonline.com/subscribe or call one of the numbers below.

LARRY KING
CNN Anchor, and the Former Host of Larry king Live
(1985-2010)

As the former host of CNN’s Larry King Live, the first worldwide phone-in TV talk show, Larry King has been a mainstay in network broadcasting for over 50 years.

Larry King Live debuted on CNN in 1985, featuring its now famous mix of celebrity interviews, political debates, and political discussions. Overall he has done more than 50,000 interviews throughout his half century in broadcasting, including exclusive sit-downs with every US president since Gerald Ford.

Mr King’s famed NAFTA debate between Vice-President Al Gore and Ross Perot smashed cable industry ratings records and obtained the highest rating in CNN history – reaching more than 16.3 million viewers.

Both Mr King’s radio and television shows hav won the George Foster Peabody Award for Excellence in Broadcasting. He has also won a News and Documentary Emmy Award for Outstanding Interview and 10 Cable ACE awards for Best Interviewer and for Best Talk Show Series. Mr King was also awarded the Genesis Awards from the Humane Society of the US for Outstanding Talk Show.

In addition, Mr King founded the Larry King Cardiac Foundation, which has raised millions of dollars and provided life-saving cardiac procedures for needy children and adults. He also established a journalism scholarship at George Washington University’s School for Media and Foreign Affairs for students from disadvantaged backgrounds.
NIAL O’REILLY
Journalist, Head of English Service, Euronews

Nial O’Reilly is the Head of the English Service at Euronews, the world’s leading multilingual TV news channels. After studying journalism in London, Nial first worked for the BBC as a reporter and producer in Northern Ireland in the early 1990s. Working for television and radio he covered many of the landmark events during the last violent years of ‘the Troubles’ and the drawn-out peace process that was to follow. Seeking a new challenge he moved to France in 1999, to work for Euronews. He was appointed Head of English Service in 2003 and has held the post since. His responsibilities include ensuring the quality of the on-air and online output of Euronews’ English service meets the required editorial standards, and management of a team of anglophone journalists. He has been in charge of several special projects, including the recruitment and training of journalists for Euronews’ Turkish, Persian, Ukrianian and Polish services.
Our mission is a source of pride each and every day: responding to today’s needs while shaping the world of tomorrow.

Throughout the world, the men and women at GDF SUEZ focus their businesses on responsible growth to take up today’s major energy and environmental challenges: responding to energy needs, fighting against climate ensuring the security of supply and maximizing the use of resources. Present in the exploration-production activity for more than ten years, GDF SUEZ carries out its offshore activities in 13 countries and has 156 offshore exploration-production licences in its asset portfolio, which are mainly in the United Kingdom, the Netherlands and Norway. At the end of 2010, thanks to the expertise of more than 1,500 employees, GDF SUEZ held 815 million of barrels of oil equivalent (Mboe) of 2P reserves and produced 51.2 million of barrels of oil equivalent (Mboe). Deploying its activity in new exploration zones, as Australia and Indonesia, GDF SUEZ is committed to the sustainable and responsible development of its exploration-production activities in terms of the respect and safety of its teams.

DEVELOPMENT OF INTERNATIONAL ENERGY PARTNERSHIP WITHIN THE FRAMEWORKS OF INTERNATIONAL ASSOCIATIONS

4TH OCTOBER 2011
14-00 PM
TIMUR SULEIMENOV  
Vice-Minister of Economic Development and Trade,  
Republic of Kazakhstan  

Timur Muratovich Suleimenov was born on April 5, 1978. He graduated from the Pavlodar State University named after S Toralgryrov at the Specialty of Economics and Management in Social Spheres and Industries in 2000 and at the Specialty of Law in 2006. In 2002 he got MBA at the University of Maryland under the Bolashak Program.  
He started his career as a manager for Family Outpatient Clinic No. 3, the city of Pavlodar. From 2002 to 2006 he worked as an Ernst & Young Chief Consultant. From 2006 to 2009 he worked as the Director of the Tax Planning Department of the KazMunaiGaz E&P JSC. He held the office of the Vice Minister of Economics and Budget Planning of the Republic of Kazakhstan from March 2009.  
From March 2010 he has been the Vice-Minister of Economic Development and Trade of the Republic of Kazakhstan.

KLARA RAKHMETOVA  
Counsellor of KAZENERGY Association  

In 1986, she defended her thesis for the degree of Candidate of Economic Sciences in the field of ‘Economics, Organisation and Management of Oil and Gas Industry Facilities’ at the Moscow I.M. Gubkin Institute of Oil and Gas.  
Main professional activities: Strategic priorities of oil and gas industry complex development: energy security; economic and technical policies in the sphere of pipeline transport development; issues of international cooperation in the sphere of oil and gas transportation; and improvement of legislative base in the oil and gas industry. Her experience of operation in the oil industry is over 30 years.  
She held offices of Senior Research Fellow of the Fuel and Energy Complex Department, Research Institute of Planning and Standards under the Kazakh SSR State Planning Committee, and Department for Efficient Use of Natural Resources, Institute of Economics under the Kazakh SSR Academy of Sciences. In 1993, she was appointed Scientific Secretary of the Kazakhstan Institute of Strategic Studies under the President of the Republic of Kazakhstan, later she was Coordinator of the Kazakhstan Economic Security and Petroleum Policy Optimisation Programmes of Kazakhstan Information & Analytical Centre.  
From September 1997 on, Klara Rakhmetova held various positions in KazTransOil NOTC CJSC. In 2001, she was appointed Deputy Director for Corporate Development, Oil & Gas Transportation NC CJSC.  
From March 2002, from the inception of KazMunaiGas NC JSC, till April 2011, Klara
Rakhmetova worked as Director of the Oil Transport Assets Management Department. Since May 2011 to date, she has been Counsellor of KAZENERGY Association. She is a member of Kazakhstan’s core negotiating group on the Energy Charter Treaty documents. She has over 50 publications on economic and technical problems of oil, gas, and petrochemical industries, on transportation of Kazakhstan oil, on the legal status of the Caspian Sea, on the reform of Kazakhstan’s economy – in the Russian, English, German, and Farsi languages. Honorary awards: Certificate of Honour dedicated to the 100th anniversary of Kazakhstan’s oil from KazTransOil NOTC CJSC. Badge of Honour from KazMunaiGas NC JSC. Badge of Honour 70 Years to Pipeline Transport of the Republic of Kazakhstan from the Ministry of Energy and Mineral Resources of Kazakhstan. Certificate of Honour dedicated to the Oilman’s Day from KazMunaiGas NC JSC. Letter of Gratitude from President Nursultan Nazarbayev of the Republic of Kazakhstan.

ZHANAR AITZHANOVA

THE JOINT-STOCK COMPANY «NATIONAL COMPANY «KAZMUNAYGAS», ABBREVIATED AS JSC NC “KAZMUNAYGAS”

The National Company "KazMunayGas" (KMG) is Kazakhstan’s national operator for exploration, production, refining and transportation of hydrocarbons which represents interests of the State in the oil and gas industry of Kazakhstan. 100 per cent of KMG’s shares are owned by the JSC Sovereign Welfare Fund “Samruk-Kazyna”.

Key business areas:
- Exploration and production of oil and gas;
- Oil transportation;
- Gas transportation;
- Oil refining, marketing and sale of oil and petrochemicals;
- Services provided for the petroleum sector;

The National Company "KazMunayGas" pursues the aim to ensure full benefits for the Republic of Kazakhstan from participation in the development of the national oil and gas industry.

"KazMunayGas" holds the leading positions in the oil and gas industry providing the quarter of oil production, 80 percent of oil transportation and virtually 100 percent of gas transportation and 85 percent of oil refining in Kazakhstan.

Up to date the largest companies incorporated in "KazMunayGas" group are:
- JSC "Exploration and Production "KazMunayGas" (Oil and gas exploration and production)
- JSC "KazTransOil" (oil transportation)
- JSC "KazTransGas" (gas transportation)
- JSC "KazMunayTeniz" (offshore oil operations)
- JSC NMTC "KazMorTransFlot" (tanker transportation)
- JSC "KazMunayGas" - oil refining and marketing» (oil and petrochemicals sale at the domestic and international markets).

The Joint-Stock Company "National Company "KazMunayGas" was established on the basis of merger of National oil and gas company «KazakhOil» and National company "Oil and Gas Transportation" by Decree No. 811 of the President of the Republic of Kazakhstan of 20 February, 2002 «On Measures for Further State Interests Promotion for the Sustainable Oil and Gas Industry Development of the National Economy».

Tengizchevroil is a Kazakhstan partnership that explores, develops, produces and markets crude oil, gas and sulfur. We pride ourselves in conducting our operations in accordance with the world-class safety and environmental standards.

The Tengiz field in Western Kazakhstan was discovered in 1979 and now is one of the world’s deepest producing super giant fields. In April 1993, Tengizchevroil LLP was formed between the Republic of Kazakhstan and Chevron Corporation. Current partners are: Chevron, 50 percent, KazMunaiGas, 20 percent, ExxonMobil, 25 percent and LukArco, 5 percent.

Crude production for the first half of the year was 13 million metric tonnes (104 million barrels). In the first half of 2011, TCO exported crude oil via the CPC pipeline to Novorossiysk, via rail to Odessa and Feodosiya, as well as to Aktau, then further to Batumi and Kulevi.

From 1993 to 2011, TCO has invested more than $645 million to fund social projects in the Atyrau Oblast for the community and employees. TCO invested $20 million in the Egilik (benefit in Kazakh) program in 2010. Most of the investment was focused on rebuilding the water system in Kulsary city. In 2011, TCO has another $20 million budgeted for its Egilik program, the majority of which will again be targeted at the continued construction of the Kulsary water system.

In 2011, TCO’s Community Investment Program, focused its $800,000 U.S. dollar budget on programs designed to improve the quality of health care, education and training in Atyrau oblast.

BG International Limited (Kazakhstan)

BG Group is a world leader in natural gas, with a strategy focused on connecting competitively-priced resources to specific, high-value markets. BG Kazakhstan is a part of BG Group, which has been active in Kazakhstan for almost 20 years. BG Group holds a 32.5 per cent interest in the giant Karachaganak oil and gas condensate field and, along with our partner, ENI, is a joint operator of this field. It is also a 2 per cent shareholder in the Caspian Pipeline Consortium (CPC), which links Kazakhstan’s oil reserves to world markets.

BG Kazakhstan’s community involvement programmes are themed around skills transfer, education and the protection of the environment. BG Kazakhstan is building on its existing social involvement activities to deepen its support for the Government’s Sustainable Development agenda. This is principally directed at the fields of human capital and energy efficiency.

BG Kazakhstan also organises the highly popular BG Energy Challenge – Kazakhstan event. This annual cross-country event combines staff team-building with networking throughout the oil and gas sector, as well as raising money for charity.
Chevron is one of the world’s leading integrated energy companies, with subsidiaries that conduct business worldwide. The company’s success is driven by the ingenuity and commitment of its employees and their application of the most innovative technologies in the world. Chevron is involved in virtually every facet of the energy industry. The company explores for, produces and transports crude oil and natural gas; refines, markets and distributes transportation fuels and other energy products; manufactures and sells petrochemical products; generates power and produces geothermal energy; provides energy efficiency solutions; and develops the energy resources of the future, including biofuels. Chevron has been headquartered in California for 130 years and is the state’s largest company. More information is available at www.chevron.com

In Kazakhstan Chevron ranks as the leading private oil producer and currently holds stakes in the country’s two largest producing oil fields: Tengiz and Karachaganak. Chevron is also the largest private shareholder in the Caspian Pipeline Consortium.

TOTAL Exploration and Production is present in Kazakhstan since 1993. More than fifteen years ago, TOTAL actively participated, as one partner of the first International Consortium, in the world’s largest seismic survey, in the northern sector of the Caspian Sea. This large scale geophysical survey, led to the discovery of Kashagan in the year 2000. The field, located in a challenging shallow water environment is currently under development.

TOTAL E&P Kazakhstan holds a 16.81% share in the North Caspian Sea PSA, which includes the Kashagan field and other discoveries under appraisal. Since January 2009, TOTAL E&P Kazakhstan has stepped up its involvement in Kazakhstan by taking a major role in North Caspian Operating Company (NCOC), the Operator of the North Caspian Sea Production Sharing Agreement and Kashagan project, contributing its expertise in complex exploration and production challenges worldwide.

In October 2009 during the visit of President Sarkozy, KazMunaiGaz (KMG) and TOTAL E&P Kazakhstan executed Heads of Agreement on Khvalynskoye project and took advantage of this opportunity to boost cooperation between KMG and TOTAL E&P Kazakhstan. Total is actively studying often opportunities to contribute to exploration of remaining undiscovered resources in Kazakhstan, and to strengthen its partnership with KMG.

In the frame of its corporate social responsibilities, TOTAL E&P Kazakhstan has shown a great interest in the training of the young Kazakhs, offering every year to outstanding students, scholarships for international master’s degree courses in France. There is a cooperation with Kazakh British Technical University, Kazakh National Technical University, Nazarbayev University, and Academy of Public Administration. Also TOTAL E&P Kazakhstan initiated a new proposal on establishing Kazakhstan Welding Institute in collaboration with Karaganda State Institute and Ministry of Education and Science. The international recognition has been finally completed in July 2011 and Kazakhstan officially became 55th country member of the International Institute of Welding.
Statoil is an international energy company with operations in 34 countries. Building on more than 35 years of experience from oil and gas production on the Norwegian continental shelf, Statoil is committed to accommodating the world’s energy needs in a responsible manner, applying technology and creating innovative business solutions. Headquartered in Norway, Statoil has 20,000 employees worldwide, and is listed on the New York and Oslo stock exchanges being among the world’s 50 largest listed companies. Today Statoil is producing 1.89 million barrel of oil equivalent (boe) per day (equity production), the proven reserves account to 22 billion boe. Statoil is one of the world’s largest net seller of crude oil, the world’s largest operator in water deeper than 100 meters, the world leader in carbon capture and storage, the second largest exporter of gas to Europe.

Statoil focuses on contributing to sustainable development via its core activities in the countries in which it operates. Statoil is committed to openness and anti-corruption work, and to respect for human rights and employee rights. That applies both to its own activities and to those parts of the value chain over which Statoil has significant influence.

Statoil has been involved in Kazakhstan since the BP and former Statoil Alliance established an office in Almaty in 1992. New Statoil sole office in Astana was established in 2004 to look for business opportunities in the North Caspian region.

Автомобили, заправленные водорослями: научная фантастика или наука?

Скажите «водоросли», и большинство людей подумают о тех несимпатичных зеленых организмах, которые можно обнаружить в плавательных бассейнах и аквариумах. Однако для ученых и инженеров ExxonMobil водоросли представляют собой кое-что намного более привлекательное — возможности. Почему? Потому что водоросли могут стать возобновляемым источником энергии, способным одновременно пополнять углекислый газ.

Получаемая из водорослей энергия может однажды дать биотопливо, соизмеримое с обычным нефтяным топливом. Вот почему ExxonMobil намерен реализовать масштабную долгосрочную научно-исследовательскую программу, направленную на такой рентабельный источник топлива как водоросли. В отличие от таких источников биотоплива, как кукуруза и сахарный тростник, водоросли не конкурируют с продовольственным снабжением. К тому же водоросли могут способствовать сокращению парниковых газов благодаря своему свойству пополнять углекислый газ.

В рамках этой прогрессивной исследовательской работы ExxonMobil объединяет усилия с пионером в области биотехнологий — компанией «Синтетик Дженомикс Инк.». Наша цель — произвести топливо на основе водорослей в будущем, чтобы дополнить виды топлива, используемые в автомобилях сегодня с одновременным снижением выбросов парниковых газов. Водоросли еще никогда не выглядели столь симпатично.

Strategic acquisitions and successful integration make Siemens one of the basic suppliers of equipment in the field of oil and gas. Our portfolio contains solutions on the compressor and pump equipment, applications for power generation and transmission, water supply, automation and illumination systems, industrial IT equipment and service. Division «Oil and Gas» works on projects of gas turbine power plants construction to cover own needs of the electricity for the oil producing companies, modernization of control and management systems at operating power plants, construction of combined cycle power plants, as well as supplies and services drives and pumping equipment for main oil and gas pipelines.

Supplying components and systems for the enterprises in the power industry, the division «Oil and Gas» renders services for maintenance of the electricity production equipment and process steam, and also drives and compressors. Gas and steam turbines of Siemens for equipping of power plants have a high degree of efficiency and differ with profitability and environmental safety.

New design solutions, excellent engineering and maximum benefits during all life time – this are what is always present at all components, products, systems and the services offered by Siemens to the oil and gas sector. Siemens integrated solutions are created taking into account all aspects planned by the customer capital and operating costs, guaranteeing the maximum profit at the minimum expenses during realization of the coordinated decisions.

Products and solutions:
- Gas turbines (<50 MW);
- Steam turbines (≤ 250 MW);
- Turbo compressors and electric drives for industrial processes;
- Automation and management of processes of investigation, extraction, transportation, manufacture, oil refining and gas;
- Solutions on the basis of information technology for the industrial enterprises.

EXHIBITORS
Eni operates in the oil and gas, electricity generation and sale, petrochemicals, oilfield services construction and engineering industries. In these businesses it has a strong edge and leading international market position. Every action will be more and more based on making the most of people, contributing to the development and well-being of the communities with which it works protecting the environment, investing in the technological innovation and energy efficiency, as well as mitigating the risks of climate change.

Eni is active in 77 countries with a staff of about 78,417 employees. Eni has been present in Kazakhstan since 1992. Main activities are performed in the Karachaganak field onshore in western Kazakhstan and in the area covered by the North Caspian Sea PSA in the shallow waters of the Northern Caspian Sea. In the medium term Eni’s production in Kazakhstan is expected to grow due to the contribution of increased gas volumes produced at Karachaganak and the start up of Kashagan.

LUKOIL OVERSEAS SERVICE B.V.,

The LUKOIL company started its activity in Kazakhstan in 1995. Today LUKOIL is one of the most active foreign companies in the oil and gas sector of Kazakhstan, participates in extracting projects (Tengiz, Karachaganak, Kumkol, Alibekmola, Kozhasaj, Northern Buzachi, Karakuduk, Armand), prospecting (Tub-Karagan, Zhambaj Southern - Southern Zaburune) and infrastructural projects (CTC).

LUKOIL’s projects in Kazakhstan started in 1995. Since then LUKOIL has invested over $6.5 billion in the economy of Kazakhstan. It also plans to invest more than $2 billion by 2020.

LUKOIL Overseas is one of the largest investors in the Mangystau, Aktobe, Kyzylorda and West Kazakhstan regions. The company is actively and responsibly participating in the development of the social structure.

LUKOIL, being a socially responsible company, fulfills all its obligations to the people of the Republic of Kazakhstan. The company constantly supports local companies and small businesses by raising the professional level of the employees.

Since 2006, the company implemented the program of social partnership “Arai”, aimed at residents in the rural areas of the Mangystau and Aktobe regions. This initiative gained great popularity among the population and helped to create hundreds of jobs.

LUKOIL regularly provides social support to veterans of the Second World War, disabled people, children from needy families and financial help to the medical and sports organizations. It also provides support to regional funds, museums, art organizations, creative collectives in preservation and development of culture and art in Kazakhstan.

One System – All The Information

Data Media Systems Global (DMS) provides concise in depth information for companies looking for project related business opportunities within the Energy Industry. We currently track over 20,000 projects worldwide.

DMS uses primary sourced information directly from the Project Owners Investors & Contractors.

The DMS database is an essential business tool for manufacturers of equipment as well as engineering and construction companies. It is also an invaluable data source for reference libraries, research institutes, publications, oil & gas portals and government export promotional institutions. With offices throughout the region DMS has developed a local network that allows it to provide this information quicker and more accurately than any trade journal.

The concept of DMS is to bring to you an integrated system that provides a cost effective solution for data knowledge and management, saving time, effort and expenditure in your marketing strategy.

We are moving in a right direction confidently, the exactingness of audience let us to be in a tonus and to strive for achievements.

NUR-Media- objective and efficient!
The history of Khabar Agency JSC started in 1995 when the National Television News Agency Khabar was established on the basis of the Kazakh TV Information Service. Khabar Agency JSC is being marketed at the modern media space as an information and entertaining resource. Today it is the leading national television agency of Kazakhstan broadcasting in the Kazakh, Russian and English languages for over 13 million of viewers. Khabar Agency JSC owns two republican TV channels (Khabar and El Arna), National Satellite Television CASPIONET, Khabar Radio and Internet portal www.khabar.kz. The Ministry of Communications and Information of the Republic of Kazakhstan is one shareholder of the Khabar Agency JSC. The management body is represented by the Board of Directors which includes 6 members, and 2 of them are independent Directors. An executive office is represented by the Board. Daily average broadcasting of the Agency channels includes the following: Khabar (20 hours), El Arna (16 hours), CASPIONET (24 hours), Khabar Radio (20 hours). There is almost 100% of coverage of the TV audience around Kazakhstan. The Agency has the developed correspondent network in Kazakhstan and foreign countries, including Austria, Great Britain, Kyrgyzstan, Tajikistan, Russia and Belarus. Moreover, the Agency carries out the joint project HABAR-TASS with the largest Russian ITAR-TASS News Agency. Thanks to that project, the Kazakhstani audience has an opportunity to receive the operative information from many countries of the world. Besides its own information, the Company actively uses products of the leading world mass-media within the limits of partnership relations. Programs and employees of the Khabar Agency JSC have been rewarded with many national and international professional awards. So, in 2003, the Agency won a nomination of Quality and Technologies at the International Arch of Europe. Works of journalists of the Information Programs Department were nominated for the EMMY, the most prestigious television award, and one of the reportages received the Grand Prix at the Gold Verb Competition (Russia). Programs and employees of the Sport Department were also rewarded with the higher international professional awards. One of the youth-orientated programs at the international festival in Japan was included into the top ten best programs of the world. The Khabar Agency is a member of the Asian-Pacific Broadcasting Union (ABU), Organization of Asian-Pacific News Agencies (OANA) and Asian-Pacific Institute of Broadcasting Development (AIBD).
CASPIONET

CASPIONET is the first national satellite television channel of the Republic of Kazakhstan. It is a part of the “Khabar Agency” JSC. CASPIIONET is watched throughout Europe, Central Asia, the Transcaucasia region, the Middle East and North Africa. The number of potential viewers is estimated at 99 million people.

The channel started broadcasting on October 25th, 2002. CASPIONET broadcasts 24 hours a day. All the television programmes are aired in Kazakh, Russian and English.

CASPIONET’s mission is to present the fullest picture about Kazakhstan to foreign viewers.

The channel format is informative and educational.

On weekdays, the program schedule consists of three-hour language program segments, each of which contains news, business news, sports news, weather forecasts and also theme-based journals and original programmes produced by the channel.

SUNDAYS ON CASPIONET, Broadcasting of classical and contemporary feature films; Documentary masterpieces of Kazakhstan; Television series of Kazakhstan; Unique theatrical productions; Concerts of maestros of classical, folk and pop music; The best programmes by the “Khabar”, “Yel Arna” and “Kazakhstan” television channels.

THE FIRST NATIONAL TV CHANNEL, KAZAKHSTAN

The first National TV Channel ‘Kazakhstan’ was established in 1958 and was one of the originators of the Kazakh television. At the beginning, the channel broadcasted 5 hours a week only. In the course of time, the television infrastructure has been developed and technical capabilities have been considerably improved.

Currently, the Kazakhstan TV Channel is the largest media resource of the country.

Technical equipment allows broadcasting coverage of 100% of the territory of the Republic of Kazakhstan and also frontier regions of Russia, Kyrgyzstan, Uzbekistan, Turkmenistan, China and Mongolia. One of the major achievements of the channel is its indisputable leadership among the other participants of media space on propagation and popularization of the state language. Programs of all genres are present on the air of the Kazakhstan Channel including entertaining and educational programs for people of different age, news and original talk shows, political and economic programs and projects aimed at popularization of the state language. Expensive world projects are also successfully carried out and broadcasted via the Kazakhstan Channel. Each televiewer can find there something useful and interesting.
The STV Independent TV channel (named as the Rahat TV until 2009) was established in 1994. The priority task of the channel staff is to provide authentic and full information on political, economic, cultural and social life of the country. The Channel programs are designed for the wide audience and include information and analytical programs, reports on incidents, musical shows, author programs, serials, feature films and entertaining programs for the whole family.

THE EXPRESS K

The Express K, a nation-wide socio-political daily newspaper, has been published since 7 November 1920 (before 28 August 1991 it was issued as The Leninskaya Smena). The Express K comes out in A2 format five times a week on Tuesdays, Wednesdays, Thursdays, Fridays, and Saturdays, with the first and last pages (cover pages) colour-printed. The publication is distributed throughout the country. The newspaper is available both in retail sale and by subscription. Regularly updated electronic versions of the publication and its archive can be found on The Express K website www.express-k.kz.

The Express K is printed in five cities of Kazakhstan, in Astana, Almaty, Aktobe, Kostanai, and Pavlodar. This provides for speedy delivery of the newspaper to the consumer within the shortest possible timeframes.

The Express K columnists and correspondents work in twelve cities of the country: Aktobe, Karaganda, Kostanai, Kyzylorda, Petropavlovsk, Taraz, Ust-Kamenogorsk, Uralsk, Shymkent, Pavlodar, Semipalatinsk, and Taldykorgan. The editorial office is located in the capital city of Astana. In Almaty, the newspaper’s correspondent station is deployed staffed with dedicated personnel.

The Express K staff consists of highly professional personnel. Our 74 employees use state-of-art equipment in their work. Our readership are people aged 18 to 45. 69.8% of our readers enjoy average or above average incomes.

The Express K coverage is followed by the Government agencies and the Parliament, it is read by both intellectuals and workers. The newspaper is always within the RK President’s eyeshot.

In 2002, The Express K newspaper was honoured with Altyn Zhuldyz Academy of Journalism Award and nominated the best national newspaper in the Russian language. In 2003-2004, at the Choice of the Year Competition, the newspaper won the title of Number 1 Socio-Political Daily in Kazakhstan.

Competently, precisely and on the fly!
This motto reflects in full the principles of work of the Kazakhstanskaya Pravda, one of the oldest republican newspapers.

• Big format
• 5 issues a week
• The biggest circulation in Kazakhstan among the daily newspapers in Russian – over 100,000 copies. Moreover, the whole circulation is certified (every issue is officially confirmed by the Commercial and Industrial Chamber of the Republic)
• Electronic version, including English
• Verified channels and sources of information
• Solid system of regional news offices.
• Daily continuous work in the field of the content promotion.

National newspaper Kazakhstanskaya Pravda is the most important source of official and business information provided in Russian. Decrees and orders of the Head of the State, the Parliament and Government resolutions, new laws of the Republic and information on reshuffles in the superior authorities are published on its pages.
The newspaper is distributed all over the regions of the country by retail and subscription. Its readership is very wide - from the pensioners and housewives to the large politicians and diplomats.
Other media of the Kazakhstanskaya Pravda are also popular with the readers including The Baiterek Magazine and The Astana Times (a newspaper in English).
PANORAMA NESPAPER

Panorama Newspaper being published since January 1992 specializes on information in the sphere of politics, economics, business and international relations. By estimates of social researches Panorama has the clearly formed audience. These are middle class representatives, employees of financial structures, diplomatic corps, line and top officers, the scientific and creative intellectuals, students. The educational level of our readers is the highest among all media buyers. As far back as in 1995 The Financial Times in its media review called Panorama “...the most trustworthy newspaper in Central Asia...” Advertisement in our newspaper is not simple information but also an indicator of respectability of your business. Advertisement in our newspaper will help you to establish business contacts both in Kazakhstan and abroad.

ARGUMENTS AND FACTS IN KAZAKHSTAN

«Arguments and Facts in Kazakhstan» is the largest and the most authoritative printing edition in the Republic of Kazakhstan. It is the regional supplement of the weekly newspaper «A&F». According to the ratings it is the most popular weekly Russian-language publication in the world. «A&F in Kazakhstan» has been issued since 1993 and it is catered for the mass reader’s audience. This newspaper informs on the major events, interviews politicians, businessmen, celebrities; it expertizes, prints out bright reportages. The course of the editorial policy having been generated for these years is to be guided by the readers’ opinions which you express in your the letters, calls, by the personal contact with our journalists, therefore the heading «Question - Answer» became branded and obligatory. The collages by which the publications are illustrated became peculiar. On the newspaper supplement’s pages we publish the exclusive information from all spheres of life, about all regions of Kazakhstan, near- and far-abroad countries. The newspaper concept is to help the person to survive in the modern world. For 18 years the circulation of the «A&F in Kazakhstan» is stable and amounts about 90 thousand copy. Every Wednesday the newspaper’s audience is used to learning the most important news from the edition’s journalists. For these years the weekly newspaper has written about 50 thousand various people and all of them became good friends of the newspaper. The head editor is S.V. Kuzovnikov.
KOMSOMOLSKAYA PRAVDA

The Newspaper Read by Millions!
Komsomolskaya Pravda is a newspaper with over 85-year history but still popular with the wide range of readers irrespective of their social status, age and gender. The Republican Social and Political Newspaper Komsomolskaya Pravda in Kazakhstan has been publishing for over 10 years five times per week throughout the whole territory of Kazakhstan. Political and economic events in the country and abroad, national cultural and sports life, urgent problems and issues as well as socially significant topics are described on the newspaper pages. Moreover, the newspaper editorial staff prepares special projects on various subjects on the regular basis.

SUCCESS, MAGAZINE
tel/fax +7 727 394 48 32
e-mail: info@success.kz

“Success” is a full-coloured business edition for top-managers which has been working in the market of the republic for four years. The strategy of the edition is to help managers of organizations, enterprises and business structures to increase effectiveness of work and also to tell about experience of the best business people of our country. The appropriateness of chosen strategy was confirmed in practice during this period. Furthermore the priority is given to expert work, which allow top managers to orient themselves better in existent business processes.

On the eve of joining WTO in the last year and a half undivided attention was focused on problem of increasing the quality of work at all levels and implantation of international standards of quality.

fax: +47 22001310
e-mail: sales@upstreamonline.com
web: www.upstreamonline.com
Upstream has, in just over ten years since its launch, firmly established itself as the leading news source in the international oil and gas industry. Our policy is to relentlessly pursue accurate, exclusive and independent news coverage of the entire upstream oil and gas industry in every corner of the globe. The focus is on business, policy and the key players. The daring news content is supported each week by features and profiles offering an inside view of the issues and the people that make a difference in the industry. Other respected publications have also taken notice, with the Los Angeles Times stating: “The flamboyant trade weekly Upstream has become a must-read both for its bold irreverent style and its thorough coverage”. This was followed by praise from the New York Times: “For energy executives, Upstream has become a must-read, like Advertising Age or Variety or American Lawyer in their respective fields”.
Upstream is clearly a publication favored by management with 96% of its readers classing themselves in this category and 68% influencing the strategic development of their company. Little wonder, therefore, that Upstream has received the acclaim it has. Today, Upstream is read by over 37,500 influential industry executives in more than 100 countries every week.

Established in 1984, Business Monitor International is a leading print and online publisher of specialist business information on global emerging markets. Our range of daily, weekly, monthly and quarterly services covers political risk, finance, macroeconomic performance, outlook and forecast, industry sectors and the business operating environment. BMI also publishes CD-ROMs profiling multinational companies active in emerging markets.

We also publish a number of reports specifically on the Oil and Gas sector; please see the following link for further information: http://store.businessmonitor.com/industries/oilgas/.
Тематика: технологии и практика разработки нефтяных и газовых месторождений, добычи нефти и газа; результаты опытно-
промысловых испытаний и эксплуатации материалов, оборудования и технологий; экономика внедрения
новых технологий, оборудования, материалов и реагентов.

Публикации: статейные материалы в журнале отражают практический опыт ведущих отраслевых
компаний, ставят задачи перед разработчиками технологий и производителями оборудования,
предлагают как опробованные подходы, методики и решения
на нефтегазовых промыслах, так и перспективные.

Распространение: целенаправленно распространяемое среди инженерно-
технической элиты нефтегазовой отрасли,
новое издание служит связующим звеном
между специалистами-нефтяниками;
практическим подспорьем
для производства; ориентиром
для технологических компаний.

РАСШИРЕМ ГОРИЗОНТЫ, ОТКРЫВАЕМ НОВЫЕ БЕРЕГА...
Международный деловой журнал Казахстан
Оперативно, грамотно и точно!

Этот девиз в полной мере отражает принципы работы одной из старейших республиканских газет – «Казахстанской правды».

- Большой формат
- Выход в свет пять раз в неделю
- Самый большой тираж среди ежедневных русскоязычных газет республики – свыше 100 тысяч экземпляров. При этом он сертифицирован – официально подтверждается при каждом выходе Торгово-промышленной палатой РК
- Электронная версия, в том числе на английском языке
- Выверенные каналы получения информации
- Четко выстроенная система региональных корреспондентов.
- Ежедневная непрерывная работа в области продвижения контента.

Общенациональная газета «Казахстанская правда» — самый главный русскоязычный источник официальной и деловой информации. Именно на ее страницах публикуются указы и распоряжения Главы государства, постановления Парламента и Правительства, новые законы республики, сообщения о перестановках в высших органах власти.

Газета распространяется по всем регионам страны как в рознице, так и по подписке. Широк круг ее читателей: от пенсионеров и домохозяек до крупных политиков и дипломатов.

Популярностью у читателей пользуются также ее издания: журнал «Байтерек» и газета «The Astana Times» на английском языке.

ЖУРНАЛ О НЕФТИ И НЕФТЯНИКАХ КАСПИЯ

На рубеже тысячелетий журнал CASPIAN внес яркий вклад в развитие и распространение позитивной информации о странах Каспийского региона. Главной целью CASPIAN — издания, традиционно сохраняющего высокий полиграфический уровень, является обмен информацией о достижениях в экономике, культуре, а также содействие формированию нового общества больших возможностей. Журнал CASPIAN на протяжении шестнадцати лет привлекает заслуженное внимание ведущих мировых политиков, бизнесменов, исследователей, нефтяников, являясь примером плодотворного сотрудничества без границ.

THE MAGAZINE ON CASPIAN OIL AND OILMEN

At the turn of the millennium the CASPIAN Magazine has brought the rich contribution to the development and distribution of positive information on the Caspian countries. The main objective of CASPIAN as the edition traditionally maintaining the high polygraphic level is to exchange information on achievements in economy, culture and to promote formation of the new high potential society. For sixteen years the CASPIAN Magazine has been attracting the deserved attention of leading world politicians, businessmen, researchers and oilmen being an example of boundless effective cooperation.
